Over The Last Week
As of January 15, 2021
Quick Take

- +** Following the Georgia Senate run-off election, we observed an extreme amount of fund flows into bearish ETFs relative to bullish ETFs. This extreme reading caused our short-term model to improve significantly, as we view this type of negative sentiment from a contrarian point of view.
- The intermediate-term model remains extremely negative, due to a combination of negative economic news and overly optimistic sentiment in the options market and from stock market newsletters.
- +** The long-term model remains quite favorable, as valuations relative to interest rates are attractive and market breadth has remained very positive.

Overall Model Output

A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.

Defensive Equity Snapshot

Defensive Equity Allocation

Understanding the Defensive Equity Snapshot

The vertical axis of the grid combines the scores of our long-, intermediate-, and short-term models to arrive at the reward value for the stock market. The horizontal axis represents the model's internal measure of stock market risk. The reward value is divided by marketplace risk to arrive at our recommended percentage of Net Equity Exposure.

Asset allocation and diversification do not assure a profit or protect against loss. All investments carry a certain amount of risk and there is no guarantee that any strategy will achieve its investment objective. Risks of investment in Meeder Funds include foreign and emerging markets securities risks, derivative and short selling risks, credit and quantitative asset allocation risk.

Meeder Funds are distributed by Meeder Distribution Services, Inc. An affiliated investment adviser, Meeder Asset Management, services as the investment adviser to Meeder Funds.

Meeder Fixed Income Strategy

The Meeder Fixed Income Strategy allocates the fixed income component of our Meeder Dynamic Allocation, Global Allocation, Balanced, Moderate Allocation, Conservative Allocation, and Total Return Bond Fund between U.S. Government and agency securities, investment-grade bonds, high-yield corporate bonds and international debt. Employing a multi-factor model, the strategy covers both asset class and duration of fixed income securities held by the funds.
