OVER THE LAST WEEK
AS OF SEPTEMBER 27, 2024

QUICK TAKE

The long-term model has improved over the past month as we continue to observe strong market performance in domestic and international markets.

The intermediate-term model is slightly negative as optimism around the US economy and bearish outflows are at balance with bullish investor surveys.

The main driver of our 100% equity allocation continues to be low market RISK. Expected bond market volatility (MOVE index) has fallen substantially since the beginning of September and expected equity market volatility (VIX) is below its 5-year average.

A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.

DEFENSIVE EQUITY SNAPSHOT

Fully Invested (More Favorable) Fully Defensive (Less Favorable)

DEFENSIVE EQUITY ALLOCATION

UNDERSTANDING THE DEFENSIVE EQUITY SNAPSHOT

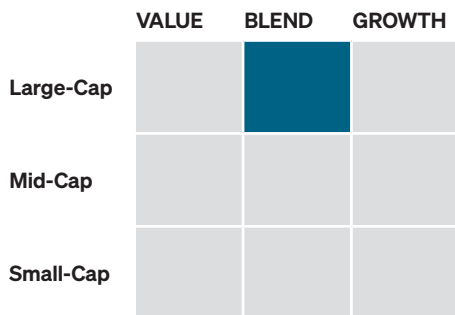

The vertical axis of the grid combines the scores of our long-, intermediate-, and short-term models to arrive at the reward value for the stock market. The horizontal axis represents the model's internal measure of stock market risk. The reward value is divided by marketplace risk to arrive at our recommended percentage of Net Equity Exposure.

Asset allocation and diversification do not assure a profit or protect against loss. All investments carry a certain amount of risk and there is no guarantee that any strategy will achieve its investment objective. Risks of investment in Meeder Funds include foreign and emerging markets securities risks, derivative and short selling risks, credit and quantitative asset allocation risk.

Meeder Funds are distributed by Meeder Distribution Services, Inc. An affiliated investment adviser, Meeder Asset Management, services as the investment adviser to Meeder Funds.

MEEDER FIXED INCOME STRATEGY

Quick Take

- » We remain overweight high yield relative to investment grade as the Fed's easing cycle has begun.
- » We are overweight emerging market debt due to a weakening dollar and momentum in the sector.
- » Our duration remains neutral at 6.0 years after the recent decline in yields. We have seen the yield curve steepen, as short-term rates have moved lower faster than long-term rates.

Fixed Income Preferences

Average Duration

The Meeder Fixed Income strategy allocates the fixed income component of our Meeder Dynamic Allocation, Global Allocation, Balanced, Moderate Allocation, and Conservative Allocation Fund between investment-grade bonds, high-yield corporate bonds and international debt. Employing a multi-factor model, the strategy covers both asset class and duration of fixed income securities held by the funds.
