

Meeder Advisory Services, Inc.

CLIENT RELATIONSHIP SUMMARY FORM CRS

We are registered with the Securities and Exchange Commission as an investment adviser. Brokerage and advisory services and fees differ, and it is important that retail investors understand the differences. Free and simple tools are available to research firms and financial professionals at www.Investor.gov/CRS, which also provides educational materials about broker-dealers, investment advisers, and investing.

What investment services and advice can you provide me?

We principally provide portfolio management services as a sub-adviser, strategist, or wrap fee program manager to retail clients using programs sponsored by third-party financial institutions (Sponsor Firm). We are typically engaged by the Sponsor Firm to offer investment management services to clients who select one of our investment programs.

Our services are offered on a discretionary basis that allows us to buy and sell investments in your account based on your selected strategy and risk profile without asking you in advance. Your investment management agreement will grant us this authority until such time as it is modified or terminated. We actively monitor these accounts and make appropriate changes in light of market conditions or changes in the selected strategy.

Investment strategies vary depending on the third-party program our services are offered on. Some programs and strategies are limited to certain types of investments, such as non-proprietary exchange-traded funds (ETFs), non-proprietary mutual funds, or proprietary Meeder mutual funds. Many programs have a minimum account size that varies between programs and is set by the Sponsor Firm.

For further information regarding our investment advisory services, please refer to our [Form ADV, Part 2 Brochure](#)

CONVERSATION STARTERS ASK US ABOUT:

Given my financial situation, should I choose an investment advisory service? Why or why not?

How will you choose investments to recommend to me?

What is your relevant experience, including your licenses, education and other qualifications? What do these qualifications mean?

What fees will I pay?

Sponsor Firms set the fees for clients who select our services in their programs. In most cases, the client pays a single asset-based fee to the Sponsor Firm, which includes fees for our portfolio management services. In other cases, clients pay an asset-based fee for our services in addition to the fees they pay to the Sponsor Firm. Our advisory fees are negotiable but will not exceed the rates found in our Form ADV Disclosure Brochure. Mutual funds and ETFs charge internal management fees and other expenses, which have the effect of reducing the overall performance of the investment. These fees and expenses are disclosed in the prospectus.

You will pay fees and expenses whether you make or lose money on your investments. Fees and costs will reduce any amount of money you make on your investments over time. Please make sure that you understand what fees and expenses you are paying. Because we charge an asset-based fee in most cases, the total fees you pay us will increase with the size of your account. This creates an incentive for us to recommend that you increase assets in your account. Our firm earns fees for investments in Meeder Investment Portfolios, which are allocated principally or exclusively among Meeder mutual funds, creating an incentive for us to recommend Meeder Investment Portfolios for a client's account.

For further information regarding our fees and how we calculate them, please refer to our [Form ADV, Part 2 Brochure](#)

CONVERSATION STARTERS ASK US ABOUT:

Help me understand how these fees and costs might affect my investments. If I give you \$10,000 to invest, how much will go to fees and costs, and how much will be invested for me?

What are your legal obligations to me when acting as my investment adviser? How else does your firm make money and what conflicts of interest do you have?

When we act as your investment adviser, we have to act in your best interest and not put our interest ahead of yours. At the same time, the way we make money creates some conflicts with your interests. You should understand and ask us about these conflicts because they can affect the investment advice we provide you. Here are some examples to help you understand what this means:

Proprietary Products. We earn fees for investments in the Meeder Funds, which creates an incentive for us to recommend Meeder Funds to our clients.

Third Party Payments. We receive payments from third parties when we sell certain products, which creates an incentive for us to recommend these products to our clients.

For further information regarding our conflicts of interest, please refer to our [Form ADV, Part 2 Brochure](#)

CONVERSATION STARTERS ASK US ABOUT:

How might your conflicts of interest affect me, and how will you address them?

How do your financial professionals make money?

Our portfolio managers and financial advisers are employees of the firm and are paid a salary. Bonuses or incentives may reflect assets under management in any given program.

Do you or your financial professionals have legal or disciplinary history?

No. For a free and simple search tool to research us and our financial professionals, visit www.investor.gov/CRS

CONVERSATION STARTERS ASK US ABOUT:

As a financial professional, do you have any disciplinary history? For what type of conduct?

Additional Information

For additional information regarding our firm and its services or to obtain a current copy of our Form CRS, visit our website at www.meederinvestment.com or call 866.633.3371.

CONVERSATION STARTERS ASK US ABOUT:

Who is my primary contact person? Is he or she a representative of an investment adviser or a broker-dealer? Who can I talk to if I have concerns about how this person is treating me?

ITEM 4 – ADVISORY BUSINESS

Meeder Investment Management, Inc. (“MIM”) offers a complete range of equity, fixed income and cash management investment solutions through its wholly owned SEC registered investment advisers: Meeder Advisory Services, Inc. (“MAS”), Meeder Asset Management, Inc. (“MAM”), and Meeder Public Funds, Inc. (“MPF”). MIM’s principal owners are Robert Meeder, Jr. and Robert Meeder, Sr. All affiliates of MIM are located at 6125 Memorial Drive, Dublin, Ohio 43017 and share employees.

Meeder Advisory Services, Inc. offers separately managed account, strategist and portfolio management services to third-party financial institutions and their clients. MAS also provides retirement plan services to plan sponsors and participants, including plan fiduciary and participant account management services. As of December 31, 2022, MAS’s regulatory assets under management were \$1,150,940,052, all of which were managed on a discretionary basis.

Private Wealth Management

Acting as a portfolio manager, MAS provides investment management services for separately managed account programs (“SMA programs”) sponsored by independent financial services firms, including banks, broker-dealers, asset management platforms, and other investment advisers (“Program Sponsors”). In all such programs, MAS is selected by the Program Sponsor to provide investment management services for some or all of a client’s invested assets. Program Sponsors help clients select a suitable investment strategy and provide MAS with written information regarding the client’s investment objectives, guidelines or applicable restrictions. SMA program clients typically

have limited direct contact with MAS investment professionals and the Program Sponsor is responsible for periodically contacting the client to ascertain whether any changes have occurred in the client’s financial circumstances or investment objectives. The Program Sponsor provides clients with account monitoring, advice and account services regarding accounts enrolled in the Private Wealth Management program.

AVAILABLE PROGRAMS

MAS offers its Private Wealth Management SMA program in several different forms, each of which shares a common investment management strategy. Where MAS has been selected as an investment manager in a wrap fee program, clients do not pay a fee directly to MAS, which receives a portion of the wrap fee charged by the Program Sponsor for asset management, trade execution, custody and reporting functions. In these programs, MAS assumes investment discretion to buy or sell securities and investments for the account consistent with the strategy selected by the client and any applicable investment guidelines or restrictions.

MAS also offers SMA program services through dual contract arrangements, in which clients execute agreements directly with MAS and pay a separate asset management fee for its investment management services. In these programs, clients enter into a separate agreement with a third-party investment adviser or program sponsor who is responsible for account monitoring, advice and account services. Fees paid to MAS in dual contract arrangements are in addition to those paid by clients to the third-party adviser. In these programs, MAS assumes investment discretion to buy or sell securities and investments for the account consistent with the strategy selected by the client and any

applicable investment guidelines or restrictions.

Finally, MAS offers SMA program services through model or strategist programs. In these programs, MAS is retained by the Program Sponsor to provide model portfolios for a given set of objectives. MAS does not exercise investment discretion or directly trade accounts for these programs. The Program Sponsor retains investment discretion and may or may not elect to execute any or all of the transactions recommended for the account. Any fee paid to MAS in a model or strategist program is paid by the Program Sponsor from the platform fees charged to the client.

INVESTMENT MANAGEMENT SERVICES

Private Wealth Management accounts offer personalized investment management tailored to each client's individual goals. All Private Wealth Management accounts are managed to a personalized benchmark selected by the client. Securities are selected for the account consistent with the selected benchmark and strategy. Portfolios are based on a strategy suitable for the client's investment objectives and risk tolerances but are individually tailored to reflect each client's investment objectives, risk tolerance, and time horizon. Meeder may deviate from the selected strategy to account for client directed mandates, including tax-management.

Clients in the Private Wealth Management program may select from a series of available strategies and personalized performance benchmarks. Meeder utilizes proprietary quantitative methodologies to select individual equities and exchange traded or mutual funds that meet the client's individualized risk and return objectives. Private Wealth Management accounts may utilize individual equity securities to maximize the deferral of capital gains and allow for tax loss harvesting where that is an account objective.

Private Access accounts offer the option to further customize the account and deviate from available benchmarks and strategies. For clients with Private Access accounts, MAS may develop a custom strategy to guide the realization of gains or losses in existing positions. MAS also designs custom portfolios for Private Access accounts around existing large or concentrated positions. Private Access clients may take other steps to customize the realization of gains or losses in the account in order to meet individualized objectives.

CLIENT INVESTMENT GUIDELINES AND RESTRICTIONS

In all Private Wealth Management accounts, clients may impose reasonable restrictions on the management of their accounts, including restrictions on particular securities or types of investments. In Private Access accounts, clients may customize the investment strategy with individualized investment guidelines. All account guidelines and restrictions will be reflected in the account agreement, application or other documentation applicable to the account. MAS may decline to accept investment guidelines

or restrictions that, in its judgment, would be unduly restrictive or impractical in light of the selected strategy. The imposition of client guidelines or restrictions on any investment strategy will cause the account to differ from other clients utilizing the same strategy.

Strategist Services

Acting as a strategist, MAS provides investment advisory and sub-advisory services to broker-dealers, platforms, and investment advisers ("Financial Intermediaries"). While each model portfolio is designed to achieve a certain investment objective, they are not tailored to meet the needs of any particular client. The Financial Intermediary is responsible for determining whether a particular model portfolio is suitable or appropriate to meet the investment needs of the client. MAS does not enter into investment management agreements with clients who select model portfolios or assume continuous supervision of the accounts. Financial Intermediaries who elect to offer model portfolios are typically responsible for trade execution, reporting, monitoring and client service tasks.

MEEDER INVESTMENT PORTFOLIOS

Meeder Investment Portfolios offer clients the opportunity to purchase a managed portfolio of Meeder Funds designed to meet a variety of investment objectives. MAS offers both risk-based models designed to achieve objectives that balance growth and income with portfolio risk, as well as age-based models designed to match specific investment objectives and risk tolerances with the investor's current age.

The portfolios consist principally or exclusively of Meeder Funds selected by the portfolio manager to meet specific investment objectives and risk tolerance levels. Meeder Funds are often the only investment options utilized for a Meeder Investment Portfolio. In other cases, MAS exercises a preference for its affiliated proprietary mutual funds but may supplement the portfolio with limited third-party mutual funds to meet specific objectives. Clients select a portfolio that meets their needs.

MULTI-MANAGER PORTFOLIOS

Multi-Manager Portfolios are offered under different platforms and under several different names. Multi-Manager Portfolios consist of a combination of Meeder Funds and non-affiliated mutual or exchange-traded funds selected by MAS from those made available by the Financial Intermediary to meet specific investment objectives and risk tolerance levels. These portfolios are generally designed to diversify assets across a series of different investment management styles and asset classes. In some cases, MAS charges a management overlay fee for its portfolio management services. In addition, MAM, an affiliated investment adviser, receives investment management fees from the Meeder Funds for fund assets included in the portfolios.

MEEDER EDGE

Meeder Edge advisory consulting services are offered to investment advisers on a non-discretionary basis. Services include a comprehensive analysis of existing investment models, analytics and model portfolio recommendations. MAS will assist Meeder Edge clients with development of suitable investment policy statements and implementation of an investment committee and portfolio review process. Meeder Edge clients receive periodic reports tracking performance of the model to suitable benchmarks with recommendations for changes or further review.

Meeder Edge services are offered on a model portfolio basis. Clients retain investment discretion and may or may not elect to execute any or all of the transactions recommended for the model portfolios. Most Meeder Edge portfolios include a tactical allocation to Meeder Funds as well as various other asset managers representing other asset classes or strategies. MAS selects managers based upon their particular expertise, product line, and how well they fit into the overall objectives of the portfolio; however, MAS will exercise a preference for its own Funds when selecting for tactical management objectives.

Investment Consulting

MAS offers professional investment consulting and management services for institutional clients. In this program, institutional clients engage MAS to provide advice on governance, investment objectives, asset allocation, portfolio strategy, manager selection and performance monitoring. Each Investment Consulting engagement is uniquely tailored to the needs of the institutional client and may include discretionary or non-discretionary management of an investment portfolio.

Retirement Plan Services

MAS also provides investment management services to retirement plan sponsors and their participants, including plan level investment management services, managed portfolio solutions, and participant level investment management services.

PLAN LEVEL SERVICES

MAS provides retirement plan sponsors with fiduciary investment management services. Acting as an ERISA Section 3(38) investment manager, MAS works with the plan sponsor to develop an investment policy statement detailing the methodology used to select, monitor and replace retirement plan investment options. In accordance with the terms of the retirement plan agreement and investment policy statement, MAS provides plan fiduciary services and exercises discretion to select, review and replace investment alternatives made available to participants in the plan. MAS representatives periodically report to plan sponsors and review the plan's investment options and their suitability under the terms of the investment policy statement and retirement plan agreement.

MEEDER RETIREMENT PORTFOLIOS

Retirement plan sponsors also engage MAS to offer managed portfolio solutions to their participants. In this program, MAS enters into an agreement with the plan to offer managed portfolios to plan participants as a designated investment option under the plan. Pursuant to the agreement and investment policy statement, MAS exercises discretion in creating and maintaining the portfolios and directs the plan's recordkeeper to implement any changes to the portfolios. Participants select a portfolio that meets their needs from those made available by the plan.

Available portfolios include risk-based portfolios designed to achieve a certain investment objective and risk tolerance, age-based portfolios that match an investment objective and risk tolerance with the participant's current age, and target date portfolios that follow an incremental glidepath in which the asset allocation becomes more conservative over time. Meeder Retirement Portfolios may be constructed from proprietary Meeder Funds, non-affiliated mutual or exchange-traded funds. For portfolios constructed from Meeder Funds, the portfolio manager exercises a strong preference for Meeder Funds, but on some platforms may supplement the portfolio with limited third-party mutual funds to meet specific objectives.

PARTICIPANT LEVEL SERVICES

Retirement plan sponsors may also designate MAS as a discretionary investment manager for participant accounts. Under this program, plan participants execute an investment advisory agreement with MAS and select from a series of portfolios, which may include Meeder Investment Portfolios containing Meeder Funds or portfolios built from non-affiliated mutual and exchange-traded funds. Plans may offer both risk-based portfolios designed to achieve a certain investment objective and risk tolerance and age-based portfolios that match an investment objective and risk tolerance with the participant's current age. Participants select a portfolio that meets their needs from those made available by the plan.

ITEM 5 – FEES AND COMPENSATION

MAS is generally compensated on the basis of fees calculated as a percentage of client assets under management, although fixed fee and other arrangements are made available to institutional clients. Some fees are negotiable depending on a various factors, including the type and size of account, services offered, and relationship to other accounts. Terms and conditions vary by program and may be found in the client agreements and disclosures for each product, program or service.

Private Wealth Management

Private Wealth Management services are offered under the following standard fee schedule. The schedule is linear and the applicable rate will be charged to all assets under management

at the rate applicable to the size of the account in the schedule below. Where billed directly by MAS, fees are typically billed monthly in arrears based on the average daily balance of the account and deducted from the client account by the custodian. Other arrangements are available and fees for these arrangements are detailed in the investment management agreement executed to open the account.

Private Wealth Management		
Assets Under Management	Select Access	Private Access
Under \$1,000,000	0.80%	0.80%
\$1,000,000 – \$2,500,000	0.70%	0.70%
\$2,500,000 – \$5,000,000	0.65%	0.65%
\$5,000,000 – \$7,500,000	0.60%	0.60%
\$7,500,000 – \$10,000,000	0.55%	0.55%
Over \$10,000,000	0.45%	0.45%
Minimum Investment	\$250,000	\$1,000,000

Private Wealth Management clients who select MAS to provide investment management services through a wrap fee or asset management program generally pay a single fee to the Program Sponsor. MAS receives a portion of the fee paid to the Program Sponsor pursuant to an agreement between MAS and the Program Sponsor. Investment management fees for wrap fee and asset management programs are negotiated separately with each Program Sponsor and program terms may vary from program to program. For these programs, the amount, terms and conditions of the fee paid by the client will be set forth in the agreements and disclosure documents provided to the client by the Sponsor Firm.

Institutional Services

Fees billed for strategist, model portfolio and Meeder Edge consulting services depend on the total assets under advisement, the nature of the investments, and the services contemplated. Agreements are individually negotiable depending on the nature of the services. Advisory fees are not typically charged in connection with Meeder Investment Portfolios, Multi-Manager Portfolios or Meeder Edge portfolios; however, MAS or its affiliates earn fees from Meeder Funds included in these portfolios. In some cases, MAS receives an annual overlay fee for management of the Multi-Manager Portfolios, which is included in the fees charged to the client by the Financial Intermediary. Investment Consulting and other individually negotiated advisory services are offered under terms tailored to the engagement, which may include asset-based or flat fee arrangements.

Retirement Plan Services

PLAN LEVEL SERVICES

The fees charged by MAS for plan level retirement services are typically based on a percentage of assets under management. Fees are negotiable and vary depending on a variety of factors, including the type and size of the plan, the nature of the services being offered and investment options to be included in the plan. The minimum fee for plan level retirement services is \$2,500. Annual management fees vary by plan, but generally range from 0.10% to 0.50% of eligible plan assets.

MEEDER RETIREMENT PORTFOLIOS

Fees charged by MAS for offering Meeder Retirement Portfolio managed account solutions to plan participants are set forth in an agreement with the plan offering the product and vary depending on a number of factors, including the type and size of the plan, the nature of the services being offered, and the type and number of Meeder Retirement Portfolios being offered. No advisory fee is charged for Meeder Retirement Portfolios containing Meeder Funds. The annual management fee for non-proprietary portfolios ranges from 0.50% to 0.75%.

PARTICIPANT LEVEL SERVICES

Fees charged for participant level retirement services are set forth in the agreement with the participant and depend on the product selected. MAS waives any investment advisory fee for the sums invested in the Meeder Funds or credits to participants an amount equal to the investment management fee that its affiliate MAM receives as the investment adviser for the Meeder Funds included in the account. Accordingly, the fee charged for investment advisory services varies from 0.00% for Meeder Investment Portfolios to 0.40% for non-proprietary portfolios.

Other Fees and Expenses

Depending on the investment advisory services, investment strategy, underlying securities and selected custodian, clients may pay additional fees or expenses for certain services or transactions. In addition, MAS earns additional compensation in connection with certain investment products or services made available to its clients.

CUSTODIAL FEES

Clients utilizing MAS services may pay other account related expenses in addition to any advisory fees payable to MAS, including brokerage commissions, advisory fees, transaction fees, custodial fees, administration fees, transfer taxes, wire transfer fees, and other fees and taxes charged to brokerage or retirement accounts. MAS products and services offered through third-party platforms are subject to other advisory, custodial and service fees charged by the platform. Item 12 of this brochure provides

additional information about the adviser's brokerage practices.

INTERNAL PRODUCT EXPENSES

Mutual funds, money market funds and exchange-traded funds charge internal management fees and other expenses. These expenses are typically charged as a percentage of the asset value of the fund and have the effect of reducing the overall performance of the investment. These fees and expenses are fully disclosed in the prospectus for the product and are in addition to the investment management fee charged for the program.

PROPRIETARY MUTUAL FUND FEES AND EXPENSES

Some portfolios include positions in Meeder Funds. A MAS affiliate is the investment adviser for the Meeder Funds and receives compensation paid by the funds for its investment advisory services. In addition, MAS's affiliates earn administrative, transfer agent and distribution fees for various services provided to the funds. These fees are set forth in the Meeder Funds prospectus and annual report. Meeder Investment Portfolios do not charge an investment advisory fee. For accounts that hold individual positions in Meeder Funds, MAS generally waives any investment advisory fee otherwise due under the investment management agreement for the sums invested in the Meeder Funds but may charge an overlay fee in some instances for management of non-proprietary funds.

FINANCIAL ADVISER FEE

The financial adviser fee is paid to unaffiliated broker-dealers and investment advisers who refer clients to MAS and compensates them for consultation and other services provided to clients who select MAS services. Where applicable, the financial adviser is responsible for obtaining information regarding the client's financial situation and investment objectives, making a determination that the recommended investment program is suitable for the client, providing the client with information about the program and its investment adviser, assisting the client with the account paperwork, and being reasonably available to the client for ongoing consultation. Financial advisers receive compensation for these services at a rate approved by the client up to 1.50%. This fee is paid separately from the investment management fees charged by MAS and may increase the total fees paid by the client.

Additional Information about Fees and Expenses

Depending on the program, investment advisory fees may be charged monthly or quarterly in arrears. The terms and conditions for each product and plan vary and may be found in the agreements and disclosures for that product. For most MAS products, fees payable to MAS are deducted from the portfolio by the financial intermediary, custodian or plan trustee. Clients who opened accounts under pre-existing fee schedules will continue to be billed at the rates set forth in the account documentation unless notified otherwise. Fee and billing arrangements for legacy accounts may therefore vary from the

program's current fee schedule and billing terms.

For participant level services, the amount, terms and conditions of the investment advisory fee, including any applicable solicitor, administration or servicing fee, is set forth in the plan participant or investment advisory agreement.

REPRESENTATIVE COMPENSATION

MAS's portfolio managers typically earn a salary, plus year-end bonus dependent on a series of factors including firm profitability and each individual's achievement. Your financial adviser may earn a portion of the advisory fee paid to MAS for the services offered in the account. Compensation varies depending on the program, the representative's overall revenue and any discounts offered. Our supervised persons are paid on the same schedule regardless of the product offered and have no financial incentive to recommend one product over another.

OTHER COMPENSATION

Some investment advisor representatives of MAS are also registered representatives of an affiliated brokerage firm, Meeder Distribution Services, Inc. ("MDS"). MAS does not direct brokerage order flow to MDS and its representatives do not receive commissions on the sale of securities purchased in advisory accounts. However, dually registered investment adviser representatives are eligible to receive compensation for the sale of securities, including commissions, distribution or service fees from the sale of mutual funds, when acting in the capacity of registered representatives of MDS.

The practice of accepting commissions for the sale of securities presents a conflict of interest that may give our firm or its supervised persons an incentive to recommend investment products based on the compensation received. The firm generally addresses this conflict by explaining to clients that commissionable securities sales create an incentive to recommend products based on the compensation that the firm or its supervised persons may earn and offering alternative fee-based advisory programs that do not pay commission-based compensation on the sale of mutual funds.

ITEM 6 – PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT

MAS does not charge performance-based fees.

ITEM 7 – TYPES OF CLIENTS

MAS offers investment advisory services to financial intermediaries, investment advisers, retirement plans and retirement participants. Strategist services are offered exclusively to broker-dealers, platforms, investment advisers and other financial intermediaries who wish to offer the models to their clients. MAS offers Retirement Plan Services to plan sponsors and

their participants. Terms and conditions of MAS services, including minimum account size, vary among individual programs and are set forth in the agreements or other documents describing the product or service.

In its Private Wealth Program, MAS does not typically serve retail clients directly. Retail investors may select Private Wealth Management services through programs offered by investment advisers with which MAS does business. It is the responsibility of the referring adviser to obtain necessary information about the client's investment objectives, risk tolerance and financial circumstances and determine that the selected investment account type, program and strategy is suitable and appropriate for the client. MAS will ensure that its discretionary management is consistent with the selected strategy and mandate. MAS will accept direction from the client's selected investment adviser regarding selection of the strategy and implementation of restrictions, and MAS does not undertake an independent evaluation to determine if the program is suitable for the client.

ITEM 8 – METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

METHODS OF ANALYSIS AND INVESTMENT STRATEGIES

Through its investment advisory affiliates, Meeder offers a broad array of equity, fixed income and other investment strategies designed to meet the needs of individual investors and retirement participants. Meeder offers its strategies to clients in a variety of forms, including the Meeder Funds, portfolios, separately managed accounts, and individually managed accounts. Depending on the product or service selected, Meeder will allocate assets across a wide variety of securities and other investments, including Meeder mutual funds, unaffiliated mutual funds, ETFs, closed-end funds, fixed income securities, individual equities and alternative investments.

Meeder specializes in quantitative investment analysis. This is a method of evaluating securities and other assets by analyzing large amounts of data through the use of quantitative models. Our investment models consider a wide breadth of factors – from traditional valuation and profitability measures to momentum indicators, to other price signals. This data universe, combined with our proprietary signal construction methodology and optimization process, is used to create the proprietary models that guide our investment process. Meeder performs ongoing research to continually maintain and improve the effectiveness of its quantitative investment models and analysis.

Some strategies are customized to meet the individual needs of our financial partners and may only be available to certain platforms or plans. MAS designs and implements an asset allocation strategy for each of the portfolios and allocates assets across funds available on each platform under the terms of each product or service. Each portfolio has its own objective and risk

characteristics. Some portfolios include an allocation to alternative asset classes, such as derivatives, commodities or other alternative investments. MAS utilizes these methods of analysis and investment strategies to develop and manage the Meeder Investment Portfolios, Multi-Manager Portfolios and Meeder Retirement Portfolios.

Summary of Material Risks

Investing in securities involves risk of loss. Although MAS manages client assets in a manner consistent with the stated investment objective and risk tolerance of the portfolio product, the investment decisions we make may not produce the expected returns, may lose value, or may cause the account to underperform other accounts with similar investment objectives. There is no assurance that a client's investment objective will be achieved. Material risks associated with investments managed by the adviser include:

Asset Allocation Risk: Many strategies rely heavily upon allocation of assets among different asset classes to achieve their investment objectives through diversification. If asset classes perform differently than expected, the portfolio or account may perform worse than a non-diversified portfolio or account.

Commodities Risk: The strategies may cause us to invest in underlying funds that invest in commodities. Investments in commodities are subject to greater volatility than traditional securities. Commodity prices are influenced by unique factors distinct from those that affect stocks and bonds, including supply and demand factors, weather, currency movement, and international government policy.

Concentration Risk: Some portfolios are concentrated in the Meeder Funds, which are managed by the same investment adviser. A strategy followed by the adviser could adversely affect all or most of the funds in the portfolio, causing it to perform worse than a portfolio diversified over multiple managers.

Credit Risk: Corporate debt and other fixed income securities are subject to the risk that the issuer will be unable to meet principal and interest payments on the obligation. A decline in the credit quality of a fixed income investment, held directly or inside a fund or investment pool, could cause a loss in value. When interest rates rise, the value of corporate debt securities typically declines. Changes in interest rates, economic conditions and default expectations can impact the value of fixed income fixed income securities.

Cybersecurity Risk: Cybersecurity breaches may allow an unauthorized party to gain access to the adviser's proprietary information or customer data or cause the adviser or its service providers to suffer data corruption or lose operational functionality. Although the adviser has established cybersecurity and data protection protocols, there is no guarantee that these efforts will succeed or that a third-party service provider or issuer will not suffer a cybersecurity breach and related loss.

Derivatives Risk: Some strategies may include underlying funds that utilize derivatives, including futures and options. Derivatives are riskier than other types of investments because they may be more sensitive to changes in economic or market conditions and could result in losses that significantly exceed the original investment. Derivatives also are subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index.

Emerging Markets Risk: Investments in emerging markets may be subject to lower liquidity, greater volatility and the risks related to adverse political, regulatory, market or economic developments in less developed countries as well as greater exposure to foreign currency fluctuations.

Exchange Traded Funds Risk: Many strategies utilize exchange traded funds (“ETF”), which may not be able to exactly replicate the performance of the indices they track. An ETF may also trade at a discount to its net asset value.

Foreign Investment Risk: Investments foreign securities or underlying funds that hold securities of foreign issuers presents additional components of risk; including economic, political, legal, and regulatory differences compared to domestic investments. Foreign currency fluctuations may also affect the value of foreign investments.

Government, Political and Regulatory Risk: Legislative and regulatory action by the U.S. and other governments can impair the value of securities held in an account or the ability of the adviser to carry out a strategy. The imposition of U.S. government sanctions may require the adviser to sell or refrain from purchasing certain securities or negatively affect the value of other securities in a client’s account.

High Yield Risk: Fixed income securities rated below the investment grade category (non-investment grade bond, speculative grade, or junk bond) are considered speculative. Changes in economic conditions or other circumstances may have a greater effect on the ability of issuers of these securities to make principal and interest payments than they do on issuers of investment grade securities. High yield securities have greater price fluctuation and higher risk of default than investment grade securities.

Income Risk: Some strategies are designed to generate yield or income on securities held in the portfolio, which may be generated from income or principal growth. Changes in interest rates, dividend policies, or economic conditions could make it difficult for a portfolio to generate a predictable level of income and expose the portfolio to principal risk in the event available yields are inadequate to meet income objectives.

Interest Rate Risk: Fixed income securities will increase or decrease in value based on changes in interest rates. If rates increase, the value of fixed income investments will generally decline. On the other hand, if rates fall, the value of the fixed income investments generally increases. The market value of

debt securities (including U.S. Government securities) with longer maturities is likely to respond to changes in interest rates to a greater degree than the market value of fixed income securities with shorter maturities.

Investment Company Risk: Many portfolios are comprised of mutual funds and the value of the portfolio will fluctuate in response to the performance of the underlying fund. Mutual funds also generate taxable capital gains distributions to a greater extent than would be the case for a direct investment in equities held by the fund.

Leverage Risk: Some strategies may utilize funds that make use of leverage, such as borrowing money to purchase securities or the use of derivatives, which may result in additional expenses and magnify the gains or losses.

Market Capitalization Risk. Accounts or portfolios may be allocated to mid and small capitalization investments. Investments in these capitalization ranges may be more sensitive to events and market conditions than large capitalization stocks.

Market Risk: The value of securities held in an account may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Unexpected local, regional or global events and their aftermath, such as war; acts of terrorism; financial, political or social disruptions; natural, environmental or man-made disasters; epidemics, pandemics and other public health crises; recessions and depressions; or other tragedies, catastrophes and events could have a significant impact on investments held in accounts or portfolios.

Quantitative Analysis Risk: The adviser relies on quantitative data supplied by third parties to evaluate investments and construct optimal portfolios. In the event this data is inaccurate or incomplete, investment decisions may be compromised. If future market environments do not reflect the assumptions made in our quantitative models, quantitative investment strategies employed by the adviser may not be successful.

Real Estate Risk: Some strategies invest in underlying funds that invest in real estate, including real estate investment trusts. The value of these securities will rise and fall in response to many factors, including economic conditions, the demand for rental property and changes in interest rates.

Short-Selling Risk: Our strategies may cause us to invest a limited portion of a portfolio in funds that engage in short selling of securities. The fund will incur a loss as a result of a short sale if the price of the security sold short increases in value between the date of the short sale and the date on which the fund purchases the security to replace the borrowed security. Fund losses are potentially unlimited in a short sale transaction, which are considered speculative in nature.

Tax-Managed Investment Risk: Strategies designed to enhance after-tax performance may be unable to realize gains or harvest losses as expected. A tax-managed account may purchase, hold or sell securities in order to achieve tax objectives that conflict with performance considerations. While the adviser implements policies to avoid “wash sales,” a wash sale may be triggered inadvertently through trading in other accounts. Tax strategies may also be adversely affected by changes in tax legislation or regulation that affects the taxable gains or losses attributable to an account.

Tracking Error Risk: Some of our strategies are designed to track or replicate the performance of a specific index or benchmark. The performance of an account may not match or correlate with that of the index it attempts to track as a result of fees and trading expenses, client-imposed restrictions, cash flows, turnover or imperfect securities selection. Client accounts designed around an index may perform more or less than expected.

Turnover Risk. An underlying fund may actively trade portfolio securities to achieve a principal investment strategy, which can be driven by changes in quantitative investment models. A high rate of portfolio turnover involves correspondingly high transaction costs, which may adversely affect account performance over time and may generate more taxable short-term gains for shareholders or clients.

ITEM 9 – DISCIPLINARY INFORMATION

We are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of us or the integrity of our management. MAS has no reportable disclosures.

ITEM 10 – OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

MAS is a wholly owned subsidiary of MIM. Other wholly owned subsidiaries of MIM include MAM, MPF, Meeder Distribution Services, Inc. (“MDS”), Mutual Funds Service Company (“MFSCo”) and Meeder Insurance Services, LLC. In some cases, these affiliate arrangements create a potential conflict of interest between MAS and the client. These conflicts of interest are discussed in more detail in Item 11 – Code of Ethics, Participation or Interest in Client Transactions and Personal Trading.

MAM is a registered investment adviser that serves as the investment adviser for the Meeder Funds. In addition, MAM provides investment advisory services to individuals, corporations, institutional entities, retirement plans and their participants.

MPF is a registered investment adviser that provides professional investment advisory services to state and local public funds managers. MPF provides both discretionary and non-discretionary investment management services limited to the purchase and sale of fixed income securities.

MDS is a limited purpose broker-dealer and FINRA member firm which serves as the principal distributor of the Meeder Funds. MDS does not hold client accounts or execute trades for MIM affiliates.

MFSCo provides shareholder, transfer agent and dividend distribution services for the Meeder Funds and local government investment pools. Acting as the administrator for Meeder Funds, MFSCo enters into selling and service agreements with unaffiliated broker-dealers and financial intermediaries to distribute and provide other services in connection with the sale of fund shares.

Meeder Insurance Services, LLC., is a licensed insurance agency. Some Meeder representatives are licensed insurance agents or representatives of Meeder Insurance Services who may recommend the purchase of certain insurance products. Insurance products are offered on a commission basis.

ITEM 11 – CODE OF ETHICS, PARTICIPATION IN CLIENT ACCOUNTS AND PERSONAL TRADING

Code of Ethics

MAS has adopted a Code of Ethics that complies with Rule 17j-1 of the Investment Company Act of 1940 and Rule 204A-1 of the Investment Advisers Act of 1940. The Code sets forth fiduciary standards that govern the conduct of directors, officers and employees who have access to client information. The Code incorporates the firm’s outside employment, political contribution, and gift policies. Personnel subject to the Code must acknowledge their compliance with the Code and applicable securities laws and report any violations of the Code with which they become aware to the firm’s Chief Compliance Officer. A copy of the Code is available to prospective and current clients upon request.

Directors, officers and employees of MAS and its affiliates may take positions in securities owned by the firm’s clients, which may pose a potential conflict of interest. The firm has implemented policies designed to detect and mitigate such conflicts of interest, including prohibitions on unacceptable trading activities, such as front running, short-swing trading and insider trading. Directors, officers and employees who recommend securities or have access to non-public information are prohibited from trading materially in reportable securities recommended to clients in close proximity to the client’s transaction. Employees having access to this information must also make periodic reports of their securities accounts and transactions in reportable securities.

Participation or Interest in Client Transactions

Among its available investment options, MAS offers portfolios allocated principally or exclusively among Meeder Funds selected by MAS to meet specific investment objectives and risk tolerance levels. Meeder Funds are often the only investment options utilized for these portfolios. In other cases, MAS exercises a preference for its affiliated proprietary mutual funds but may supplement the

portfolio with third party mutual funds to meet specific objectives. Because MAS and its affiliates earn fees when proprietary mutual funds are selected for these portfolios, this presents a conflict of interest. The mutual fund fees differ between the available Meeder Funds and the total fees collected by MAM and its affiliates will vary depending on the fund allocation in each portfolio. Mutual fund fees for each of the Meeder Funds may be found in the Prospectus.

MAS acts to mitigate this conflict by not exercising discretion over whether or to what extent a client's assets will be invested in a proprietary portfolio solution. MAS typically waives any investment management fee for the sums invested in the Meeder Funds in a proprietary portfolio solution. When allocating portfolios among Meeder Funds, MAS applies fund selection criteria that do not differentiate between or among Meeder Funds and portfolio managers responsible for these strategies are not compensated based on the amount earned by Meeder in management fees for the portfolio.

The Private Wealth Management program does not generally utilize Meeder Funds in its portfolios or exercise discretion in transactions in these securities. In the event a client's account contains Meeder Funds when it is transferred into the Private Wealth Management program, MAS may continue to hold the security at the direction of the client or may sell the security under a program approved by the client.

ITEM 12 – BROKERAGE PRACTICES

When retained on a discretionary basis, MAS may be authorized to determine and direct execution of client portfolio transactions through brokers, dealers and other trading intermediaries. If transaction charges are not included in a wrap fee or other all-inclusive relationship, clients will pay the transaction charges associated with the execution of trades in their accounts. When selecting broker-dealers to undertake trading on a client's behalf, MAS seeks best execution under the circumstances of each trade.

Best Execution Policies

In selecting brokers through which transactions for client accounts will be executed, MAS's primary consideration is the broker's ability to provide best execution of trades. In making a decision about best execution, MAS may consider a number of factors including, but not limited to, trade price and commission, current market conditions, size and timing of the order, depth of the market, per share price, difficulty of execution, financial responsibility and the ability and willingness of the broker to commit capital by taking positions in order to effect executions. The commission rates paid to any broker for execution of transactions will be determined through negotiations with the broker. MAS regularly reevaluates the execution performance of the broker-dealers it selects for placement of client transactions.

Wrap Fee Programs

Where MAS is retained under a wrap fee or other all-inclusive program, commissions and trading expenses are generally included in the fee charged by the Program Sponsor. In some cases, MAS may be required to execute all trades through the program sponsor or custodian. In other cases, MAS may have discretion to select broker-dealers to execute trades for the accounts it manages inside such a program. However, MAS will generally place such trades through the Program Sponsor because the program fee only covers execution costs on trades executed through the Program Sponsor's platform. MAS may select a broker-dealer other than the Sponsor or its affiliates to effect a trade for a program account if it determines that it is in a client's best interest to do so. When MAS directs trades to a broker-dealer other than the Program Sponsor, a practice known as trading away, clients will pay additional transaction costs not otherwise included in the Program Sponsor's asset-based fee.

Trade Aggregation Policy

MAS may elect to aggregate trades executed for a client's account with trades being executed for the same securities in other accounts we manage, including trades for the Meeder Funds. Each client participating in an aggregated transaction receives the same average share price and transaction costs are shared equally and on a pro-rata basis. If the full amount of an aggregated order is not filled, the partially executed order will be allocated on a pro-rata basis based on the size of the original allocation.

Trade Rotation Policy

Where MAS offers portfolio management services on a model basis, notification of changes to the model are made pursuant to the firm's trade rotation policy. Each broker-dealer, platform or investment adviser ("Financial Intermediary") using the model is included in the rotation along with Meeder discretionary accounts utilizing the same model. When a change is made to a model portfolio, MAS sends notification to each Financial Intermediary or group of similarly managed accounts in the order of their appearance on the rotation schedule. MAS will not wait for confirmation of order receipt or execution before communicating model changes to other Financial Intermediaries. Each Financial Intermediary is then moved up the schedule by one spot for subsequent changes to the model.

Depending on a Financial Intermediary's place on the rotation and the method elected by that Financial Intermediary for communication of portfolio changes, it is possible that trades will be placed by some Financial Intermediary's before or after others. Accounts for Meeder discretionary clients utilizing model portfolios are included in the rotation and it is possible that trades for other Financial Intermediaries will take place before or after trading for Meeder's discretionary clients depending on their placement in the rotation. In these cases, trades may become subject to price movements that result in model portfolio or Meeder discretionary

clients receiving prices that are less favorable than prices obtained by others. Because MAS does not control execution of transactions in model portfolio accounts, MAS does not know in what order its Financial Intermediary clients will execute trades and cannot control the market impact of such transactions.

Trade Error Policy

MAS has established a trade error policy to address instances in which the adviser makes an error when ordering, executing or settling securities transactions for a client account. In the event a trading error is caused by the action or inaction of MAS, the adviser will correct the error so that the client is returned to the same economic position it would have been in had the error not occurred. If the error or trading delay was caused by a third-party broker-dealer, custodian or adviser, MAS may in its discretion reimburse the client in whole or in part for the loss but is not required to do so.

When correcting errors detected after settlement of a trade, MAS will reimburse clients for losses resulting from a MAS error in the client's account. If an erroneous trade settles in a client account and results in a gain, the client will retain the resulting gain unless the client elects to decline it. When calculating losses, the adviser does not net gains and losses between clients or between investments in an affected account except in connection with corrections approved by the client.

MAS has established error accounts with certain brokers for the purpose of correcting trade errors detected prior to settlement. Any securities acquired by such an account for purposes of correcting a trade error are promptly disposed of. MAS is responsible for paying net losses incurred when correcting such a trade. Net gains in error accounts may be retained in the account and used to offset future net losses or donated to charity depending on the program. All trade errors and related calculations are documented and reported to the compliance department.

ITEM 13 – REVIEW OF ACCOUNTS

MAS regularly monitors and reviews individually managed client accounts to ensure that each such account is managed consistently with the selected strategy and any investment guidelines or restrictions provided by the client. Reviews are consistently performed by investment personnel assigned to the account and all accounts are reviewed on a regular basis. Separately managed account clients generally receive quarterly reporting, although some clients may receive additional reporting based on the nature of the services provided.

Meeder Investment Portfolios, Multi-Manager Portfolios and Meeder Retirement Portfolios are assigned to a portfolio manager who reviews the portfolio no less than quarterly to ensure that it meets the selected asset allocation and diversification goals for the product. Additional reviews may take place during significant market events or at a Financial Intermediary's request.

Recommended changes to funds selected for a portfolio are reviewed by the firm's Investment Committee.

For plan level Retirement Plan Services clients for whom MAS serves as an investment manager, MAS regularly reviews the plan's designated investment alternatives and their respective performance in light of the plan's investment policy. Using suitable performance benchmarks, MAS evaluates funds and investment managers and makes or recommends suitable changes to the investment alternatives made available by the plan. Recommended changes to the plans are reviewed by the firm's Retirement Investment Committee.

ITEM 14 – CLIENT REFERRALS AND OTHER COMPENSATION

MAS receives referrals of clients through representatives of broker-dealers and investment advisers not affiliated with our firm. Where applicable, the financial adviser is responsible for obtaining information regarding the client's financial situation and investment objectives, making a determination that the recommended investment program is suitable for the client, providing the client with information about the program and its investment adviser, assisting the client with the account paperwork, and being reasonably available to the client for ongoing consultation. Financial advisers receive compensation for these services at a rate approved by the client up to 1.50%. The arrangement provides the financial adviser with an incentive to refer clients and secure their participation in the program. This fee is described in Item 5 of this brochure and may increase the total fees paid by the client.

MAS also pays referral fees, known as promoter payments, to unaffiliated third-party broker-dealers, investment advisers and other persons who refer clients to MAS or endorse our services. Promoters are not employees or current clients of the firm. Under these arrangements, MAS shares a portion of the advisory fees collected from the client with referring promoter. Annual fees payable to promoters are negotiable and may be based on a percentage of the client fee or the value of the client's account. The arrangement provides promoters with an incentive to refer clients and secure their participation in the program. Each promoter who recommends or endorses our services is required to provide the prospective client will full disclosure of the solicitor's relationship with MAS and the material terms of the compensation arrangement.

MAS or its affiliates have also entered into written agreements with unaffiliated investment advisers whereby MAS recommends or endorses that firm's investment advisory services to its clients. MAS or its affiliate receives a portion of the fees charged by the unaffiliated investment adviser in return for referring the account. Annual fees payable under such arrangements are negotiable and may be based on a percentage of the client fee or the value of the client's account. This arrangement presents a conflict of interest because it provides MAS with an incentive to solicit and secure

participation in the program. Under each such arrangement, MAS is required to provide prospective clients with full disclosure of MAS's relationship with the recommended firm and the material terms of the compensation arrangement.

MAS and its affiliates offer several bank deposit programs to clients, both directly and in affiliation with third parties. In some programs, MAS's affiliates receive payments from third parties for introducing new clients or depository institutions to the program. Our affiliates also sometimes make payments to third parties that introduce the adviser to new clients or depository institutions. These arrangements are described more fully in the program materials for each such program. These arrangements present a conflict of interest because we earn fees from these programs that would not be earned in unaffiliated cash sweep programs or money market funds. We mitigate this conflict through full disclosure of the program terms and compensation arrangements.

ITEM 15 – CUSTODY

MAS does not provide custodial services to its clients. Custody services are selected or provided by the Financial Intermediary or retirement plan sponsoring the program that has selected MAS services. Client will receive from the custodian, at least quarterly, an account statement that identifies the assets in the account with the custodian at the end of the period and that lists all transactions in the account for the period. Clients are encouraged to compare the statements received from their custodians with any statements provided by MAS.

ITEM 16 – INVESTMENT DISCRETION

MAS provides both discretionary and non-discretionary investment advisory services. For many SMA program accounts, individually managed participant accounts, and other managed retirement programs, MAS assumes discretion over management of its clients' accounts and has authority to determine the securities to be bought or sold, and the amount and timing of those transactions, without obtaining prior client consent. This discretionary authority allows MAS to select investments that meet each client's investment objectives. Authority is granted under the terms of the applicable investment management agreement governing the account and is subject to each client's established investment guidelines or restrictions.

MAS does not exercise discretion over strategist or model programs in which the intermediary is responsible for execution of securities trades. In non-discretionary programs, MAS makes periodic investment recommendations to clients in the form of models, strategies or asset allocations. In some cases, non-discretionary clients may ask MAS to place orders for the purchase or sale of recommended securities through executing brokers selected by MAS or the client. In other cases, MAS assumes no responsibility for execution and is responsible only for periodically updating the model consistently with the selected strategy.

ITEM 17 – VOTING CLIENT SECURITIES

Depending on the platform, MAS typically accepts authority to vote proxies on behalf of its clients in discretionary accounts. The adviser has adopted and implemented proxy voting policies, procedures, and voting guidelines reasonably designed to ensure that the firm votes proxies in a manner consistent with the best interest of our clients and the fiduciary duties owed to them. For clients who have assigned or otherwise delegated responsibility to MAS to vote proxies, the adviser will retain and exercise final authority and responsibility for voting. MAS will generally not accept instructions from clients as to how to vote individual proxies; however, separately managed account clients may elect not to delegate proxy voting to the adviser and vote all proxies for the account directly. MAS will neither advise nor act on behalf of clients in legal proceedings involving companies whose securities are held in a client's account, including the filing of "proofs of claim" in connection with class action settlements.

Oversight of Proxy Voting

MAS has established a proxy voting committee comprised of senior managers representing operations, compliance and investments. The committee is responsible for selecting and annually reviewing the performance of any third-party proxy advisory firm retained to assist the adviser in carrying out its proxy voting responsibilities. When exercising due diligence to select or renew contracts with a third-party advisory firm, the adviser will consider a variety of factors, including capacity and competency of the firm, processes for obtaining and distributing information, methodologies used to develop voting recommendations, and conflicts of interest. The committee is also responsible for reviewing and annually approving proxy voting guidelines to ensure that they are current, appropriate and in the best interest of the firm's clients.

Proxy Voting Administration

The adviser has engaged an unaffiliated third-party proxy advisory service to assist with proxy voting, including receipt and collection of proxy ballots, providing proxy voting research services, and executing votes. Acting through its proxy voting committee, the firm has adopted proxy voting guidelines that direct how the firm will vote most proxies. The proxy advisory service will populate votes in accordance with the guidelines and automatically submit the votes prior to the submission deadline. Proxies are voted in accordance with the guidelines unless the adviser determines that the guidelines would not be in the best interests of the firm's clients.

MAS's compliance department is responsible for overseeing the proxy advisory service, ensuring that proxies are received and voted in accordance with the guidelines, identifying individual ballots for more detailed analysis, and monitoring for additional information from issuers. In the event a proxy ballot is not addressed by the guidelines, an issuer has submitted additional material reasonably expected to affect the outcome, or the ballot

warrants individual attention for other reasons, the compliance department will forward the issue to the committee for its determination on how to vote the proxy. Proxies forwarded to the committee will be voted in a manner consistent with the best interests of MAS's clients.

Conflicts of Interest

The adviser and its proxy voting committee consider conflicts of interest when approving a third-party proxy advisory firm and adopting proxy voting guidelines. The use of proxy voting guidelines is designed to mitigate most potential conflicts of interest when voting proxies. MAS will not knowingly vote proxies for any client in a manner designed to benefit any other client. In the event the adviser intends to directly vote a proxy inconsistent with or not covered by the proxy voting guidelines, the committee and compliance department will examine any potential conflicts of interest between the interests of the firm and its clients before any action is taken.

Recordkeeping

MAS and its proxy advisory firm maintain records of each proxy received, each vote cast, guidelines utilized to cast votes, material research or documentation related to proxy voting, and written client requests for information. To obtain a copy of our policies and procedures, voting guidelines or a written report of how proxies were voted on your behalf, contact us at 1-800-325-3539 or by email at contact@meederinvestment.com.

ITEM 18 – FINANCIAL INFORMATION

MAS has no financial commitments that impair its ability to meet contractual and fiduciary commitments to its clients and has not been subject to a bankruptcy proceeding.
